

Surface Saver Marble Polish-Paste is the original polishing compound for marble, limestone, travertine, onyx, and cement-based terrazzo. It has a wide range of applications, and the ultimate in user friendliness.

Directions:

Place 1-2 ounces of Surface Saver Marble Polish / Paste in the area to be worked.

Add water to produce a thick slurry and buff over approximately 25 S/F area with a weighted floor machine using a white or natural fiber floor pad or Tampico brush.

When the desired polish is obtained, wet vacuum the slurry, flood rinse, and wet vacuum a second time. Move to the next area, overlapping to blend.

When the total area is completed, rinse thoroughly and wet vacuum an additional time.

When dry, buff with a white pad to insure removal of any remaining residue.

Marble Polish-Paste

- For polished marble, onyx, limestone, travertine and cement based terrazzo
- Pre-mixed formula
- Safer than powders and user friendly

Net Contents – 25 lbs For Professional Use

For Professional Use
